

elqava

With Elqava we want to change the way coffee lovers discover and buy their favourite coffee.

Elqava was formed around the notion of the 'perfect cup' of coffee. We are coffee lovers who have made it our pledge to introduce fellow coffee lovers to coffee from the micro-roasters from Europe and help them discover their perfect cup.

Micro-roasters carefully select their beans and roast in small batches to ensure the best quality and flavour, this gives our coffee lovers access to amazing coffees they would never have experienced otherwise. Along with each sample, we introduce the roaster and give the brief history of each product. Each of the independent roasters across Europe has a unique approach and its own vision, resulting in a unique product. We want our members to appreciate their art of coffee and enable this through our e-commerce platform.

Equidam

Equidam is the online tool to help entrepreneurs evaluate their businesses. We offer a technology based on real-time benchmarking to assess companies' features and performance in an objective and scalable way, which enable entrepreneurs to clearly disclose and explain the value of their businesses.
